# GALVANIZED STEEL CANOPY

Our galvanized steel carports use high-strength galvanized steel as the core material, combining scientific design and exquisite craftsmanship to provide a protective solution that offers durability, safety, and aesthetics for your vehicle, courtyard, or commercial space, redefining the standard of 'reassuring protection. Core Material: Galvanized Steel, the 'hard-core support' of durability. The durability of the carport fundamentally depends on the quality of the base material. Our products use hot-dip galvanized steel as the main frame, applying a zinc layer evenly to the surface of the steel at high temperatures, forming a dense 'zinc-iron alloy layer' that fundamentally addresses the issues of traditional steel being prone to rust and corrosion.

## PRODUCT FEATURES

01

### SUPER DURABLE:

The main frame is made of hot-dip galvanized steel, with a zinc layer thickness exceeding 85μm, forming a dense "zinc-iron alloy protective layer."

02

### POLLUTION-RESISTANT AND EASY TO CLEAN:

The top panel can be naturally washed by rainwater, cleaning away dust and bird droppings; the frame has small gaps.

03

### HARDCORE LOAD-BEARING:

Wind and pressure resistance: calmly coping with extreme weather.

04

### FULL SCENE COVERAGE:

Suitable for villa courtyards and self-built house parking spaces, ideal for places like shopping malls, hotels, and 4S stores, to create VIP parking spaces.

# SDL1220 GMLS

## TECHNICAL PARAMETERS

### SDL1220GMLS

Material	Galvanized Metal
Roof shape	Gable
Assembly Required	Yes
Features	Simple and lightweight, large coverage area
Normal size	12*20*7 (FT)
